

## I.2-UNIX PROGRAM EXECUTION INFORMATION FOR UNIX SYSTEMS

This Chapter contains information needed to execute programs on UNIX systems for the following:

- o the Calibration System (CALB)
- o the Interactive Calibration Program (ICP)
- o the Operational Forecast System (OFS)
- o the Flash Flood Guidance System (FFG)
- o the Informix Database, OFS Processed Data Base and Gridded Data Display Program (XNAV)
- o the Informix SHEF Data Utility Program (XDAT)
- o the SHEF Encoded Time Series Program (XSETS)

### Apps\_defaults System

Many of the scripts and programs that run on the UNIX systems use `apps_defaults` to set execution controls and path names.

A description of the `Apps_Defaults` system is in Chapter I.2-UNIX-APPSDFLT.
