

VI.6.3-PPDUTIL-DUMPSTAT PROGRAM PPDUTIL COMMAND DUMPSTAT

Purpose

Command DUMPSTAT prints statistics for 24-hour precipitation, RRS and stranger station data stored in the Preprocessor Data Base.

Input Data

<u>Card</u>	<u>Field</u>	<u>Format</u>	<u>Contents</u>
1	1		'@DUMPSTAT'
	2		'PP24' to indicate a display of 24-hour precipitation statistics, or 'PPSR' to indicate a display of stranger station statistics
	3	A4	If 'RRS' is entered in Field 2 enter an RRS data type or 'ALL' ('ALL' is assumed if this field is left blank)
2	1-?		'ALL' to print statistics for all stations or station identifiers or station numbers <u>1</u> / <u> 2</u> /

Card 2 can only be entered for 'PP24' or 'RRS' statistics.

Notes:

- 1/ Type depends on whether station identifiers or station numbers are entered is specified by command STATION. The default is identifiers.
- 2/ A continuation card is expected when an ampersand (&) is found on the card to be continued.

Examples

```
@DUMPSTAT PP24
ALL
@DUMPSTAT RRS STG
ALL
@DUMPSTAT PPSR
```
