

VI.6.3-PPDUTIL-RLSEFREE PROGRAM PPDUTIL COMMAND RLSEFREE

Purpose

Command RLSEFREE releases all free pool records in the Preprocessor Data Base for the specified RRS station and data type.

The free pool records that are released contain the data for the oldest days in the period of record for the station.

Input Data

<u>Card</u>	<u>Field</u>	<u>Format</u>	<u>Contents</u>
1	1		'@RLSEFREE'
2	1	A8	Station identifier
	2	A4	Data type

Repeat card 2 to process additional stations and/or data types

3	1		'END'
