

VI.6.4-PRDUTIL-SYSTEM-MINDAY PROGRAM PRDUTIL COMMAND MINDAY

Purpose

Command MINDAY resets the value of MINDAY in the Processed Data Base.

MINDAY is used by the Processed Data Base read/write routines to preserve a minimum number of days of observed data in a time series containing regular and future data.

Input Data

<u>Card</u>	<u>Field</u>	<u>Format</u>	<u>Contents</u>
1	1		'@MINDAY'
	2	I	Minimum number days of observed data to be retained

Example

```
@MINDAY 10
```
